SUMMARY

A full-stack web developer with a previous background in the field of physiology and pharmacology. As a life sciences student, I developed skills such as planning, designing, and testing research ideas, which are transferable skills in developing web applications that meet the demand of customers. I am very motivated to work in a challenging environment and cooperatively work with my teammates to develop high-quality work efficiently.

SKILLS

LANGUAGES: JavaScript, Ruby, Python, HTML, CSS, SQL

FRAMEWORKS & LIBRARIES: NodeJS, React, Ajax, Express, EJS, jQuery, Rails

SYSTEMS & DATABASES: PostgreSQL, Git

TESTING: Jest, Storybook, Cypress, RSpec

PROJECTS

Charla Back-End
Jan. 2023 to Current

A full stack real-time chat app, where logged-in users can start conversations with other users. For now, only one-on-one conversations are available but more features will be added.

Tech Stack: Node, Express and PostgreSQL, Socket.io

Charla Front-End
Jan. 2023 to Current

A full stack real-time chat app, where logged-in users can start conversations with other users. For now, only one-on-one conversations are available but more features will be added.

Tech Stack: ReactJS, CSS, Socket.io

GlobeHunch
Dec. 2022 to Dec. 2022

A full stack geographical exploration game in which players use street view images to explore their surroundings and then guess where they are located in the world. All while earning points and climbing the leaderboard!

Tech Stack: ReactJS, CSS, ANTD, Node, Express and PostgreSQL

Jungle-Rails
Nov. 2022

A mini e-commerce application built with Rails 6.1. In this application, one can register/login to their account. Once in their account, they can add plants to their cart and then checkout using their (fake) credit card.

Tech Stack: Ruby, Rails, ActiveRecord, PostgreSQL

Interview Scheduler
Nov. 2022

A react-based project that allows users to book, edit, and cancel interviews in real-time.

Tech Stack: React, HTML, CSS, Node, Express, PostgreSQL, Jest, Storybook, Cypress
